

Scopes

Is there a solution for motorising or otherwise automating the focuser on the VSD100f3.8 astrograph?

At present Vixen does not offer a ready made solution for this.

Some customers that have purchased this astrograph have had custom 3rd party solutions developed.

We are also in discussion with 3rd party focuser makers to determine if it is cost-effective to offer an alternative focus system.

Unique solution ID: #1047
