

Mounts, Tripods and Pillars

I have an old Vixen Super Polaris Mount and require a tripod to fit this .

Please can you advise which tripod would fit into the mount?

The current range of tripods have a 45mm diameter mounting hole. You would therefore need to use the 75169 60-45mm adaptor.

Tripods available are the SXG-HAL130 (75161) or the APP-TL130 (75191).
